

Maintenance Lane Closure Guidance for use with Special Provision 01554M

NOTIFICATION OF MAINTENANCE LANE CLOSURES AND SUBSEQUENT OPENINGS

- A. Provide real-time notification of every maintenance lane closure, and subsequent lane opening, to the UDOT Traffic Operations Center (TOC) at 801-887-3700. REAL TIME NOTIFICATION IS ALWAYS REQUIRED regardless of the type or duration of the closure.
1. **Lane Closure:** Shed Supervisor or contractor designee to notify the TOC within 10 minutes before placing the first traffic control device in the travel lane. Caller should identify their name, station and location of the closure (Highway Route name/number and Mile Marker). TOC can support the maintenance closure with appropriate VMS messaging.
 2. **Lane Opening:** Notify the TOC within 10 minutes after removing the last traffic control device in the lane.
 3. Include in the notification the route, the beginning and ending milepost/mile marker, number of lanes closed or opened, direction of the closure, and the date and time.
- B. Provide advance notification of any maintenance lane closure that is anticipated to cause delay. Notification is not needed if the maintenance lane closure is during non-peak travel hours or if the maintenance closure is an emergency.
1. Notify the RCM as soon as it is known that a lane closure is necessary to execute the work and at a minimum, 72 hours before the closure (72 hour notice not needed for off-peak or emergency closures).
 2. Notify the RCM immediately when the schedule, location, or need for an upcoming lane closure changes.
 3. Include in the notification the route, the beginning and ending milepost/mile marker, number of lanes to be closed, direction of the closure, the date and time of the beginning of closure, and the date and time of the ending of the closure.
