* Portions of this route are proposed and this ADT figure was compiled for the base year 1965. The projected 1980 ADT is 41,637.
The purpose of the U. S. Numbering and Marking is to facilitate movement along the general direction of desire lines of travel over the shortest and best available roads, and a route should form continuity of available facilities through two or more States that accommodate the most important and heaviest motor traffic flow in the area.

The system was established in 1926 and the U. S. Route System has reached the point of review, revision, consolidation, and perfecting, rather than continuous expansion. Therefore, any proposed alteration in the established system should be extremely meritorious and thoroughly, though concisely, explained in order that the Route Numbering Committee and the Executive Committee of the Association may give prompt and proper consideration to each and every request made by a Member Department.

*Explanation and Reasons for the Request: (Keep Concise and Pertinent)*

The redesignation of present Interstate Route 415 from Interstate Route 15 near the south city limits of Murray in Salt Lake County, Utah, easterly and northerly to Interstate Route 80, near the mouth of Parleys Canyon to the designation of Interstate Route 215, would result in the continuity of the Belt Route from Interstate Route 80 near the mouth of Parleys Canyon southerly and westerly to Interstate Route 15, thence westerly and northerly to Interstate Route 15 near the Salt Lake-Davis County line.

The redesignation of this route would result in the signing of this route in a manner that would be beneficial to the motoring public.

Does the petition propose a new routing over a portion of an existing U. S. Route ...............? If so, where:
