

UTAH DEPARTMENT OF TRANSPORTATION

TECHNICAL BULLETIN MT-10.03

July 2018

UDOT TTQP QUALIFICATION PROGRAM

The Utah Department of Transportation (UDOT) Transportation Technician Qualification Program (TTQP) has implemented a new on-line registration for technicians' qualifications and qualification exams scheduling.

CERTIFIED TECHNICIANS

UDOT certified technicians are listed under this application, which details the technician's current status (including Independent Assurance (IA) status).

ON-THE-JOB-TRAINING (OJT)

1. The technician begins supervised training. When the technician has demonstrated proficiency to the supervisor/trainers satisfaction, the supervisor/trainer documents the training by filling out the training form (1014.3) indicating the technician is ready to certify in the area(s) they have been trained.
2. The technician schedules and attends qualification.
 - a. Original training documentation covers the first qualification attempt.
 - b. Additional training is required for subsequent attempts.

The qualifications are administered as outlined in the TTQP Registration, Policy and Information Handbook (RP&IH)

TECHNICIAN INFORMATION

This application provides the technician's current qualification status and a history of TTQP/WAQTC qualifications obtained.

REGISTRATION AND CERTIFICATIONS

Technicians may register for an examination using this application. Schedules of classes, forms and documents are available to view and download. Certifications are obtainable by filtering by company or UDOT region. Individual certifications are downloadable and printable from this application.

New users (technicians that have never enrolled in OJT or an exam) must first create a user profile before registering for OJT or examinations.
