**Notes:**

- Every attempt is made to report fatalities the day they are recorded.
- Injury type crashes are typically not finalized for approximate 60 days from occurrence.
- VMT data are not available until the following month. Until actual VMT data is reported, VMT is projected based on historical trends.
- 5 year average is calculated based on the previous years totals starting with the year prior to the current year (year used for the fatal count total).
- If no dates are entered, the default time periods are the date the query was last run for all fatality numbers, and 2 months prior to that period for all severity and total crash numbers.
- Pedestrian number includes Scooter/Skater in the Person Type field.
- Motorcycle numbers include motorized scooters and mopeds in the Motor Vehicle Body Type field.

\*Pedestrian numbers include Scooter/Skater person types.
