</tr>
</tbody>
</table>

*Current year is 3% of ave. total crashes for the past 5 yrs (as of 04/30/2019).*

### Reporting Period of the Subsequent Charts:

- **YTD Date for Fatal Crash Count**: 6/30/2019 (See Note 1,5)
- **YTD Date for Injury/PDO Crash Count**: 4/30/2019 (See Note 2, 5)
- **Number of Years to Calculate Ave.**: 5 (See Note 4)

Notes:

1. Every attempt is made to report fatalities the day they are recorded.
2. Injury type crashes are typically not finalized for approximate 60 days from occurrence.
3. VMT data are not available until the following month. Until actual VMT data is reported, VMT is projected based on historical trends.
4. 5 year average is calculated based on the previous years totals starting with the year prior to the current year (year used for the fatal count total).
5. If no dates are entered, the default time periods are the date the query was last run for all fatality numbers, and 2 months prior to that period for all severity and total crash numbers.
6. Pedestrian number includes Scooter/Skater in the Person Type field.
7. Motorcycle numbers include motorized scooters and mopeds in the Motor Vehicle Body Type field.
