SECTION

ENTRENCH THE BOTTOM 12 INCH OF SILT FENCE SECURELY IN THE GROUND AFTER INSTALLATION, TIGHTLY PULLING UPWARD ON THE TOP OF THE FENCE SHOULD NOT DISLODGE IT.

3 FT WIDE FILTER FABRIC
FASTENED TO POST

2 INCH SQUARE BY 4 FT MINIMUM WOOD POST

DO NOT DISTURB GROUND ON BACKSIDE OF SILT FENCE

NOTE 1:
1. POSITION THE SILT FENCE 5 FT BEYOND THE TOE OF SLOPE WHERE PERMITTED.

NOTE 2:
2. ALIGN THE FENCE ALONG THE CONTOUR AS MUCH AS POSSIBLE TO AVOID CREATING LOW POINTS ALONG THE SILT FENCE. PROVIDE AN OPENING IN THE FENCE AND INSTALL A SEDIMENT TRAP WHERE EXCESSIVE RUNOFF WILL ACCUMULATE AT A LOW POINT.

NOTE 3:
3. USE MACHINERY THAT WILL MINIMIZE DISTURBANCE WHEN EXCAVATING THE TRENCH.

NOTE 4:
4. RUN THE ENDS OF THE FENCE UP SLOPE TO PREVENT RUNOFF FROM FLOWING AROUND THE ENDS OF THE SILT FENCE.

NOTE 5:
5. DO NOT PLACE SILT FENCE ACROSS POTENTIAL CONCENTRATED FLOWS (E.G., PIPE OUTLETS, DRAINAGE CHANNELS, CUT DITCHES).

NOTE 6:
6. AVOID USING SPLICES ALONG THE FENCE AS MUCH AS POSSIBLE. OVERLAP THE END POSTS AND TWIST 180 DEGREES IF A SPLICE IS NECESSARY, BEFORE STAKING THE END POSTS.

NOTE 7:
7. MAINTAIN A PROPERLY FUNCTIONING SILT FENCE THROUGHOUT THE DURATION OF THE PROJECT OR UNTIL Disturbed AREAS HAVE BEEN VEGETATED.

NOTE 8:
8. REMOVE THE SEDIMENT AND PLACE IT IN A STABLE AREA APPROVED BY THE ENGINEER WHEN A STORM EVENT DEPOSITS SEDIMENT BEHIND THE FENCE.

NOTE 9:
9. REMOVE SILT FENCE UNLESS THEY ARE PROTECTING A WETLAND OR WATER BODY IN AREAS THAT HAVE BEEN SEEDED AND MULCHED.
