1. Place Sediment Traps at locations shown on the plans or as directed by the Engineer.

2. Identify the storage capacity of each Sediment Trap in the Project Plan Set.

3. Construct Trap Length twice as long as the width.

4. Maintain a properly functioning Sediment Trap throughout construction or until disturbed areas contributing to the trap basin have been paved or seeded and mulched.

5. Remove Sediment as it accumulates and place it in a stable area approved by the Engineer.

NOTES FOR STABILIZED CONSTRUCTION ENTRANCE:

1. Place Stabilized Construction Entrances at locations shown on the plans or as directed by the Engineer.

2. Maintain a properly functioning Construction Entrance throughout construction or until disturbed areas have been paved.

3. Do not allow vehicles leaving the Construction Site to track mud onto paved roads.
