**NOTES:**

1. Place near edge of signs a minimum of 6 ft from traffic face of barrier when placed behind barrier.
2. Provide a 7 ft min mounting height for all signs and plaques when sign encroaches 4 inches or more laterally above pedestrian walkway.
3. Sign minimum mounting height is shown. Maximum mounting height is 1 ft above minimum mounting height.
4. Mount primary route signs at same height.
5. No limit to sign width when sign mounting height is 17 ft or higher.
6. Refer to STD DWG SN 11 and SN 12 for median and shoulder barrier sign mounting bracket details.
7. Use a minimum sign offset distance of either the 12 ft offset from the edge of the traveled way, or the 4 ft offset from the edge of the paved shoulder, whichever is greater. Use a sign offset equal to or exceeding the clear zone whenever practical.
8. See STD DWG SN 1A to determine post sizes.
9. Mount the lowest sign in the route sign assembly at the height prescribed for single signs.
