

State Route 118

BRIDGE UPGRADE

Joseph to Monroe

Overview

This project will replace an old wooden bridge on SR-118 two miles east of Joseph near Sierra Vista Road.

The new bridge will consist of a concrete box culvert structure and new pavement.

Updates

For weekly updates, please send a request to udotregion4@utah.gov

Schedule

- The contractor will begin removing the old wooden bridge and working on utilities Monday, January 28th.
- Installation of the new box culvert bridge begins the following week.
- The bridge is anticipated to be open to traffic with a gravel surface by February 11th.
- Final paving is anticipated in April.
