

300 EAST IMPROVEMENTS

3900 South to 3300 South

April 2014

PROJECT INFORMATION

The City of South Salt Lake is currently designing improvements to 300 East from 3900 South to 3300 South. The improvements will increase safety and comply with Americans with Disabilities Act (ADA) requirements. Planned improvements include pavement reconstruction, drainage system upgrades, bicycle lanes, new curb and gutter, and partial replacement of the sidewalk.

To accommodate the construction of pedestrian ramps at cross streets, small portions of right-of-way will be purchased. Project team members will contact land owners to discuss these purchases as the project progresses.

Design work will continue through summer and a contractor will be selected in August. Currently, the project team anticipates construction to take place between August and November 2014 and March and August 2015. Underground drainage work will take place in 2014, and pavement reconstruction, curb, gutter and sidewalk work will take place in 2015. An additional mailer will be sent once construction dates are finalized.

QUESTAR WORK

Questar Gas will be working within the project limits beginning in early April 2014. Crews will be relocating a gas line to accommodate the 300 East improvements. Traffic restrictions may be in place to facilitate the gas line relocation. For more information regarding the Questar Gas work, please contact Rhonda Forde at 801-324-3158.

CONTACT US

If you have questions regarding the 300 East Improvements project, please contact our Public Involvement Manager, Carlye Sommers. Ms. Sommers is happy to answer any questions you may have.
