

WELCOME

PUBLIC OPEN HOUSE

January 20, 2016

PROJECT PURPOSE AND NEED

- The Utah Department of Transportation, in coordination with Clearfield City, has initiated a roadway improvement project to address increasing traffic demands and declining levels of service at the I-15/650 North Interchange in Clearfield.
- Planned improvements are intended to improve traffic flow and reduce accident potential on the freeway ramps, 650 North, and the 650 North/Main Street (SR-126) intersection.
- Project objectives are to optimize available transportation funds to improve the safety and operational efficiency of the interchange through the design year of 2025, while keeping improvements primarily within the footprint of existing state right of way.

SCHEDULE

Preliminary engineering design has been completed and an environmental study is nearing completion. The project is expected to proceed as follows:

- **Spring 2016** - Complete environmental study, final design and right-of-way process
- **Late summer/fall 2016** - Construction

PROPOSED IMPROVEMENTS

- Add a new dedicated left-turn lane for traffic exiting the Hill Air Force Base West Gate via westbound 650 North to the southbound I-15 on-ramp.
- Restripe 650 North/Main Street intersection to include dual right-turn lanes from westbound 650 North to northbound Main Street and dual left turn lanes from southbound Main Street to the I-15 on-ramps.
- Provide access management measures along Main Street.

Clearfield 650 North

IMPROVED

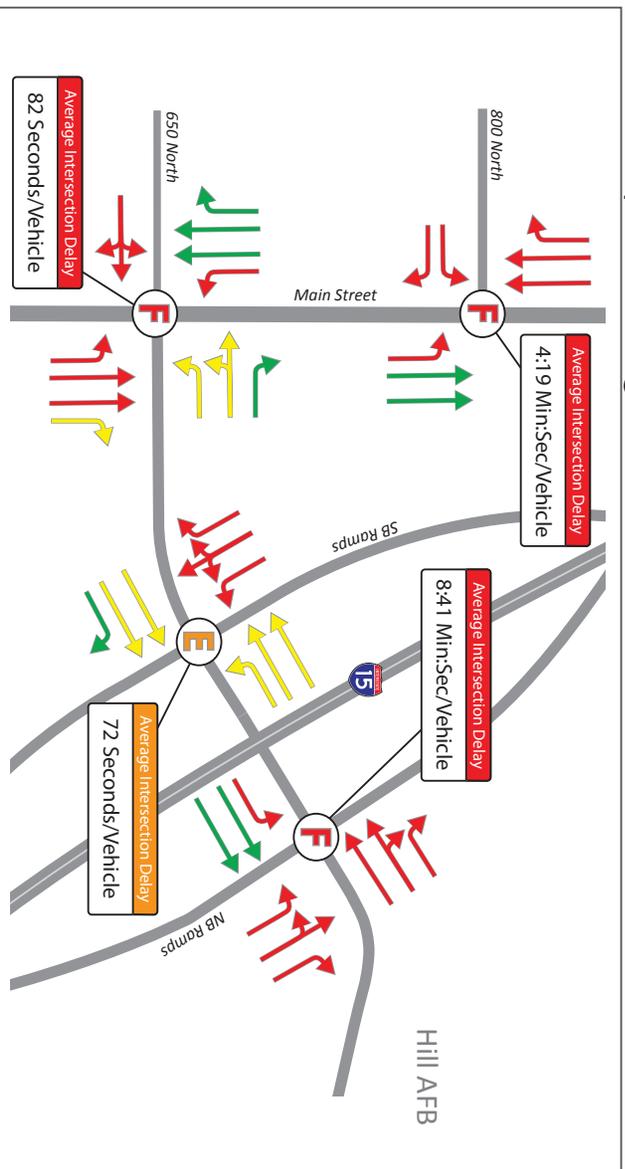

Project Benefit

80% reduction in time spent waiting at intersections in the project area.

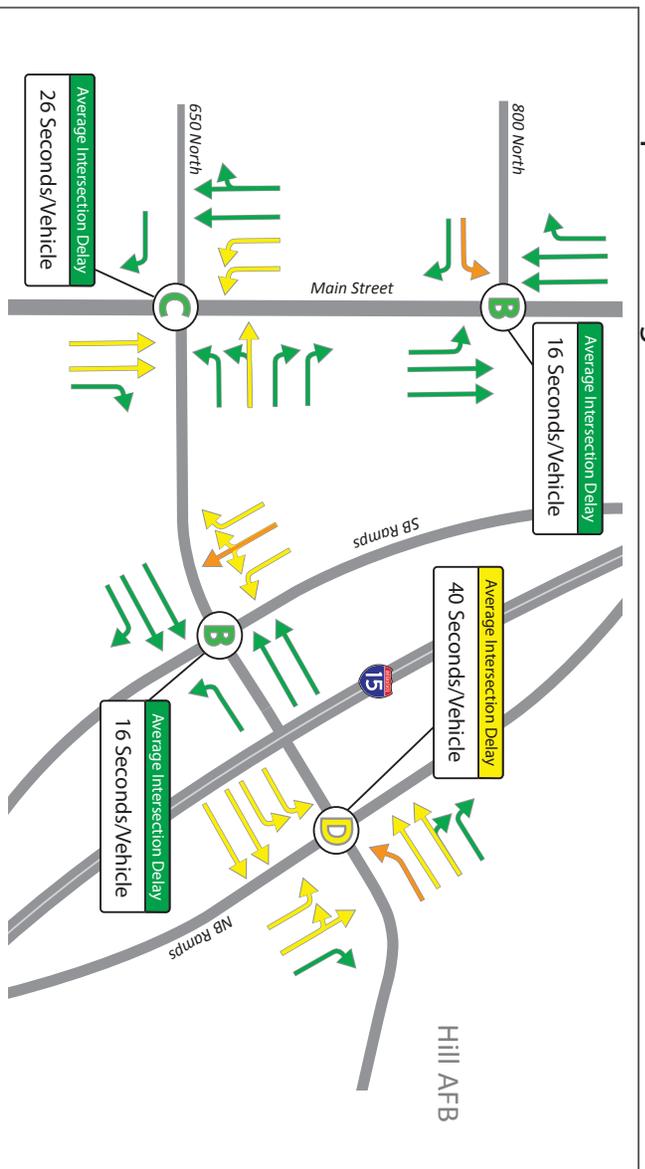

Intersection Traffic Analysis

Future PM Peak Hour (Year 2024)

Without Proposed Changes

With Proposed Changes

Level of Service Color Legend

- LOS F (80 Seconds of delay or more)
- LOS E (Between 55 and 80 seconds of delay)
- LOS D (Between 35 and 55 seconds of delay)
- LOS C to A (35 seconds of delay or less)

CONSTRUCTION IMPACTS FOR BUSINESSES AND RESIDENTS

During construction, the project team will work to minimize traffic impacts as much as possible. Travel lanes will be maintained, however, lane closures and temporary impacts to residential and business accesses are expected, with advance notice to affected stakeholders.

MORE INFORMATION

UDOT has employed a project-dedicated public involvement team to coordinate stakeholder concerns and keep the public informed throughout project design and construction.
