

Roy 5600 South

IMPROVED

A UDOT Project

CONSTRUCTION NOTICE:

5600 South Roadwork Begins May 9th

The Utah Department of Transportation (UDOT) plans to begin construction May 9th on a roadway improvement project on 5600 South (SR-97) between 1900 West and 2200 West in Roy. The project will improve roadway safety and traffic flow by widening and adding an additional westbound travel lane in project limits.

See the project map on the back of this page. 

SCHEDULE

May 9: Road work begins

May 10: Night work begins (culinary waterline installation), continuing through approximately May 21

May 16: 1900 West traffic signal switch-over to new signal during night-time hours

Late May – Early June: Surface seal of new pavement

June 7: Construction completion

TRAFFIC CONTROL & CONSTRUCTION IMPACTS

- Crews plan to work Monday through Saturday, with both daytime and night work planned.
- Travel lanes will be maintained along 5600 South and at cross-streets, however, they may be narrowed and lane shifts are possible. Motorists should expect travel delays in the work zone, especially during peak commute times.
- Sidewalk closures are possible. Student walking routes may be modified to facilitate construction and are being coordinated with school officials, who will coordinate changes with affected residents.
- Temporary impacts to residential and business accesses are possible, with advance notice provided.
- Garbage pick-up and mail delivery will be maintained and coordinated by the contractor.
- Utility service interruptions are not planned but due to the nature of roadway excavation, unplanned service interruptions are possible. The contractor will provide advance notice of any planned service interruptions.
- Every reasonable effort will be made to minimize construction dust, noise and vibration. During night work, residents should expect noise and lighting impacts in the work zone.
- Drivers are advised to reduce speeds and use caution in the work zone. Fines for traffic violations through construction zones are significant.
