

OVERVIEW

UDOT is collaborating with its partners in Sandy, South Jordan, and Riverton to address congestion and improve transportation infrastructure in anticipation of future economic and population growth. Next year, there will be multiple UDOT projects in the South Valley that will increase road capacity and improve safety for drivers, cyclists, and pedestrians. UDOT will strategically space these projects throughout the 2017-18 construction seasons to minimize impacts to residents, commuters and businesses. These projects will begin next year to ensure alternate routes are available before larger UDOT projects begin, such as the I-15 Southbound add-a-lane project. UDOT will work to ensure all stakeholders impacted by these projects receive regular updates through all stages of the projects.

AREA PROJECTS

I-15; 10600 South Interchange

10600 South; Redwood Road to Jordan Gateway

I-15; 9000 South Interchange

700 East; 7400 South to 9400 South

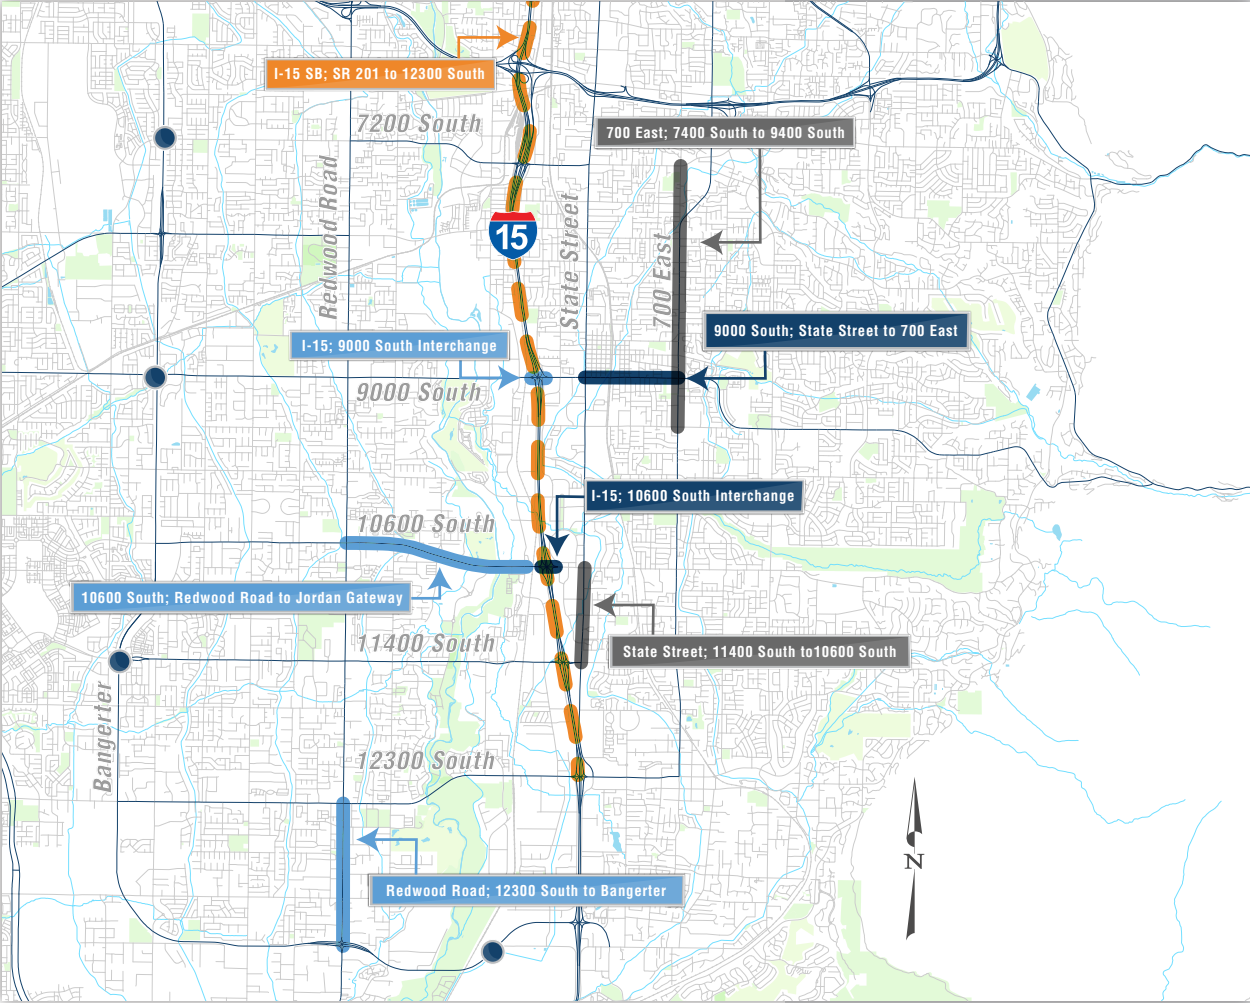

Redwood Road; 12300 South to Bangerter

State Street; 11400 South to 10600 South

I-15 SB; SR 201 to 12300 South

9000 South; State Street to 700 East

Bangerter Projects

State Street 11400 South to 10600 South

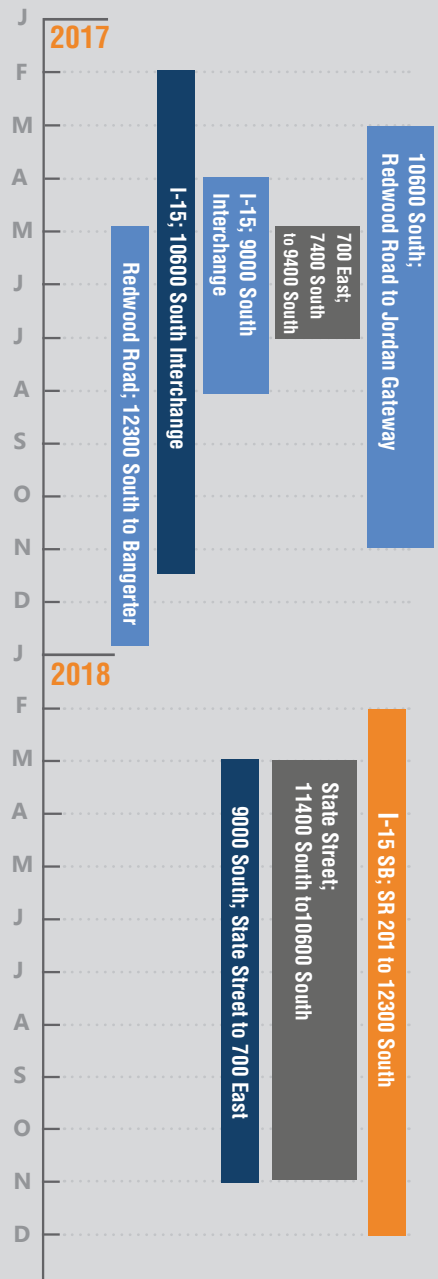

Project Summary

The purpose of this project is to address current congestion and safety concerns. Planned improvements for this corridor will:

- Improve intersections from 11400 South to 10600 South
- Restripe the roadway to six lanes
- Install continuous sidewalk throughout this corridor
- Resurface asphalt from 11400 South to 10600 South, extending the life of the roadway

The project is working through the environmental and design process, and construction is anticipated to begin as early as spring of 2018.
